

**Evan Madden**

**(267) 314 - 7267**

**evan.madden@gmail.com**

**Summary:**

I am a drummer, bartender, and booking agent who is diving into web development head first. I have a background in the music industry, as well as food and beverage.

**Current Goals:**

I am pursuing a new career path in web development, fueled by my passion for music and entertainment. My goal is to apply what I learn to the things that I love doing.

**Skills:**

Git Bash, Node, Express, MySQL, Sequelize, CSS, Bootstrap, Bulma, JQuery, JavaScript, JS, Handlebars, HTML, Insomnia Core, Heroku, Cloudinary

**Current Projects:**

**Community Canvas**

Community Canvas is a full stack application developed for users to upload and view photos of street art in their city and around the world. My role began with learning how to use Cloudinary as a digital assets management platform, and incorporating cloud capabilities into the application. Developed in a boot camp group project setting, we are expanding the application to utilize the Open Maps API to associate photo uploads to specific map coordinates.

**BandFinder**

I have collaborated on a group project, utilizing API's from Ticket Master and the music service Deezer to provide search data on upcoming live music events by area, plus links to artist information and playlists. We utilized Bulma, JQuery, JavaScript, and HTML.

**Riff Lifter Touring**

I am currently building a new site for Riff Lifter Touring, which will be a directory for various musicians' services, as well as a legacy archive of past tours and projects. The site will include profiles of various musicians, and will utilize various API's to feed live music event information to the page. I am utilizing JavaScript, CSS, Bootstrap, and Handlebars.

## **Relevant Employment:**

### **Kung Fu Necktie**

March 2015-Present

Live Music Venue in Philadelphia, PA
